II. **Birth Time Correction:**

Many points of time, from 11:30 hours to 15:30 hours, were examined to verify the time of birth. Upon the commencement of the process of birth time verification, a few points of time showed up as the possible time of birth. Therefore, these time points were examined as a starting point for correcting the time of birth. From these points and based on the planetary positions and shared events, a few points of time appeared to be reasonably accurate and were shortlisted. When correcting the time of birth, the transit Moon or the Ruling Planets were in the Sign of Venus, the Star of Mars, the Sub of Rahu and the Sub Sub of Venus.

The placement of the Lagna or the Ascendant had to be aligned with planets that matched these Ruling Planets. The Lagna placement with some of the shortlisted points of time did not match the Ruling Planets. The Lagna placement of the other shortlisted point of time was Saturn Sign, Jupiter Star, Jupiter Sub and Saturn Sub Sub. With this placement, this time of birth appeared

to be inaccurate. There was a mismatch between the Lagna Sign, Star, Sub and Sub Sub and the Ruling Planets.

This anomaly was corrected by moving the Lagna to Jupiter Sign, Saturn Star, Saturn Sub and Saturn Sub Sub. The time was now correct in the Krishnamurthi Paddhati chart.

While the time was correct in the Krishnamurthi Paddhati chart, it also had to be checked in the D1, D9 and D60 charts.

All shared events were checked in the birth and divisional charts to verify this birth time. With this time, all events shared matched in the D1 and D9 charts. However, events did not match in the D60 chart. This mismatch was corrected by moving the **D60 Lagna to** [REDACTED]. With this time, the Ascendant changed in the **D60** chart [REDACTED] earlier and 49 seconds later. However, the **D60 Lagna** [REDACTED] was accurate and required no further change.

No other time close to this time of birth was accurate in confirming the events shared by the querent.

To further verify the time of birth, some events **not shared** by the querent were derived from the verified time of birth – from the revised birth chart and divisional charts, including the D60 chart. The querent confirmed these unshared events as correct only when derived from the corrected time of birth.

Since the time was accurate in the Krishnamurthi Paddhati chart and the Divisional charts, it was concluded that the correct time of birth via Krishnamurthi Paddhati and Parashari Astrology is

**[REDACTED]:42:30 hours (p.m.)**

At this time, the Lagna/Ascendant was at [REDACTED]°14' 58.07" in Pisces in Purva Bhadrapada Nakshatra [REDACTED] Pada in the D1 Chart. The D9 Lagna was [REDACTED] 14' 42. 66" in Cancer in Ashlesha Nakshatra [REDACTED] Pada.
