#### IV. Analysis:

The Sub Lord of the [REDACTED] cusp is Mars. Since the sub lord is Mars, this shows a conflict in the workplace. Mars in the Star of Moon and in the sub of Moon. The conflict is, possibly, in the nature of a lack of meeting of minds. That is a difference in your thought process and that of your boss. It is possible that your boss does not like the assertive style of your speaking. It is also possible that your boss has a 'blue-eyed' boy and your actions are to the detriment of this 'blue-eyed' person.

In the Prashna chart you are running the Dasha of Venus-Venus till [REDACTED] [REDACTED]. During this time, you may have a lot of travelling, or you may shift to a distant place. You are now running Venus-Venus-Mars till October 2022. No significant danger to your job here. If your boss is [REDACTED], be careful how you deal [REDACTED].

You will then run Venus-Venus- Rahu till April 2023. This period could connect you with foreign jobs or foreign places associated with your job. The next is Venus-Venus-Jupiter till October 2023, which could be a somewhat stressful time at work. Be careful. However, there is no significant danger to your job. The next period is Venus-Venus-Saturn. This period requires a lot of attention concerning the profession. You will be fine. However, do put in the necessary hard work. If applicable in your case, you must demonstrate extreme professionalism [REDACTED] [REDACTED].

As above, in the next 12 months, job loss is not indicated. However, if you view a transfer/change of portfolio as a demotion, something of this nature may be possible around January-March 2023.

Please recite/listen to any Ganesha prayer every day. You may use this link :

### **Addendum 31/08/2022**

Your additional questions:

- It is possible that your applications outside the [REDACTED] will be successful
- - it is likely that you may have some (minor) reduction in your compensation in the coming months
- Transfer to a different location in the [REDACTED] is also a possibility.

### **Addendum 20/09/2022**

With random number 27:

In the next few months, your workload will be heavy. Around early November to early December 2022, you may shift or be shunted to a different office in the same city or another city in the same company.

By February 2022, you may even change your job. It may be worthwhile to note that you may be under significant mental stress or have a very heavy workload from November to mid-December 2022. This is the time that you must maintain equanimity of mind.

**Addendum of 21/09/2022**

Your email of the 21<sup>st</sup> September,2022. You are unlikely to be without a job. However, till the end of 2024, you are likely to have heavy workload and are also likely to be dissatisfied at work. This dissatisfaction will not be continuous but intermittent.

All this is common at all workplaces. So keep your eyes open for new opportunities even if you do not actively consider a change of job.

Being very busy at work or even stressfully busy at work is a theme that will continue for the next few years with periodic relief. This is how far this Prashna can go.
